

**CD652- KASA Knowledge Verification Form**

**Student:** \_\_\_\_\_ **Semester:** \_\_\_\_\_ **Instructor:** \_\_\_\_\_

<b>Knowledge Outcome</b>	<b>Knowledge Objective in Course</b>	<b>How Objective Is Evaluated</b>	<b>Initial if Objective Achieved</b>	<b>Indicate Deficiency If Objective Not Achieved</b>
42. Demonstrates knowledge of the etiologies of swallowing disorders*	D. Describe the various possible etiologies for swallowing disorders (III-C)	Evaluated by Examination		
43. Demonstrates knowledge of the characteristics of swallowing disorders*	B. Develop an understanding of neuroanatomical and neurophysiological bases for mastication and deglutition (III-B)	Evaluated by Examination		
44. Demonstrates knowledge of the prevention of swallowing disorders*	C. Become familiar with the normal physiology describing the three phases of deglutition and corresponding age-related changes (III-B)	Evaluated by Examination		
45. Demonstrates knowledge of the assessment of swallowing disorders*	F. Integrate background, medical and assessment data to form appropriate prognosis rationale for intervention (III-D)	Evaluated by Examination		
46. Demonstrates knowledge of intervention for swallowing disorders*	H. Describe the different treatment strategies for oral and pharyngeal dysphagia (III-D and III-F)	Evaluated by Examination		

(\*) = CD652 fully meets this standard

CD652 Evaluation Policy – Knowledge objectives in this course are evaluated through examination with specific sections of examinations pertaining to specific objectives. If the student achieves a score of 80% or higher on an examination, the objectives pertaining to that examination will be considered to be achieved. If the student achieves a score of less than 80%, the course instructor will analyze the examination to determine which objectives, if any, have been achieved. Deficiencies will be noted on this form above.
